Professional Summary

Full-stack software engineer experienced in building production-grade applications using React.js, Node.js, Express, and cloud deployment workflows. Strong focus on scalable architecture, authentication systems, API performance, payment integrations, admin dashboards, and DevOps automation. Passionate about shipping clean, modular, maintainable code with a product-first mindset.

Technical Skills

Frontend: React.js, Redux, RTK Query, Tailwind CSS, JavaScript (ES6+)	Backend: Node.js, Express.js, REST APIs
Authentication: JWT, Refresh Tokens, RBAC	Payments: Stripe Integration, Webhooks
DevOps: DigitalOcean, Nginx, PM2, Cloudflare	Databases: MySQL
Tools: Git, GitHub, Postman, Vite, Webpack	Platforms: Shopify (Liquid templates, storefronts)

Work Experience

Software Engineer — Redhoney Consulting Nov 2024 – Present

- Developed a large-scale **Music Platform** with modular architecture covering authentication, playlist management, admin dashboards, user personalization, media protection, and device-limit access rules.
- Built frontend interfaces using **React.js, Redux, RTK Query**, component-driven patterns, optimized API caching, and reusable admin controls.
- Designed backend services in **Node.js + Express** for secure login, refresh token workflows, RBAC, content visibility toggles, recommendations, and CRUD modules.
- Integrated **Stripe** for subscription plans, webhooks, billing automation.
- Deployed production backend on **DigitalOcean (Ubuntu)** with Nginx reverse proxy, PM2, SSL, Cloudflare caching, DNS, and server hardening.
- Built and maintained multiple **Shopify storefronts**, customizing Liquid templates, optimizing speed, and integrating third-party apps.
- Developed an internal **Admin Panel** with advanced CRUD, pagination, media controls, user/playlist management, and secure admin routes.

Projects

Expressions – Full Stack Blog Platform [Live](#) [Github](#)

Technologies: React.js, Redux, Tailwind CSS, React Hook Form, React Router, Appwrite, TinyMCE

- Engineered a full-stack blog platform using **React.js + Appwrite**, enabling secure authentication, content storage, and real-time data management.
- Integrated **Appwrite Authentication** with protected routes, improving login reliability and security.
- Designed clean post creation and editing workflows using **TinyMCE editor** and **React Hook Form** for validated forms.
- Implemented **Redux** to manage global authentication state, user sessions, and CRUD operations efficiently.
- Built a responsive, mobile-first UI with **Tailwind CSS**, improving usability and readability across devices.

Certifications

Oracle Cloud Infrastructure 2023 Certified Foundations Associate
